1997-98

Color the boy's
shirt red.

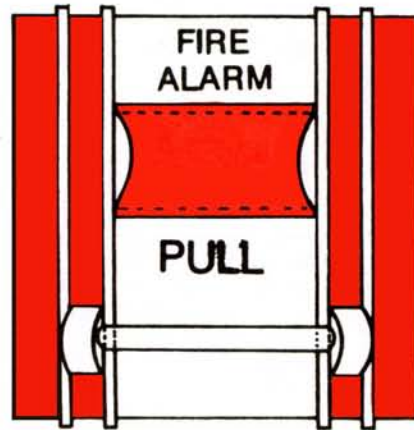

Color the girl's
coat red.

Why do you think
red is a good color for
stop signs?

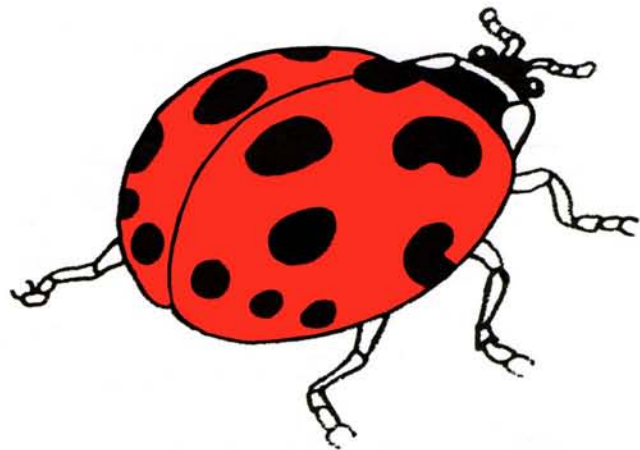

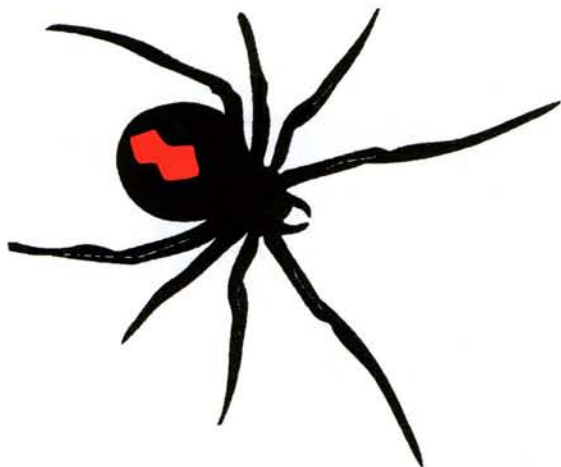

They are easy to see!

Have you seen these?
Why do you think they are red?

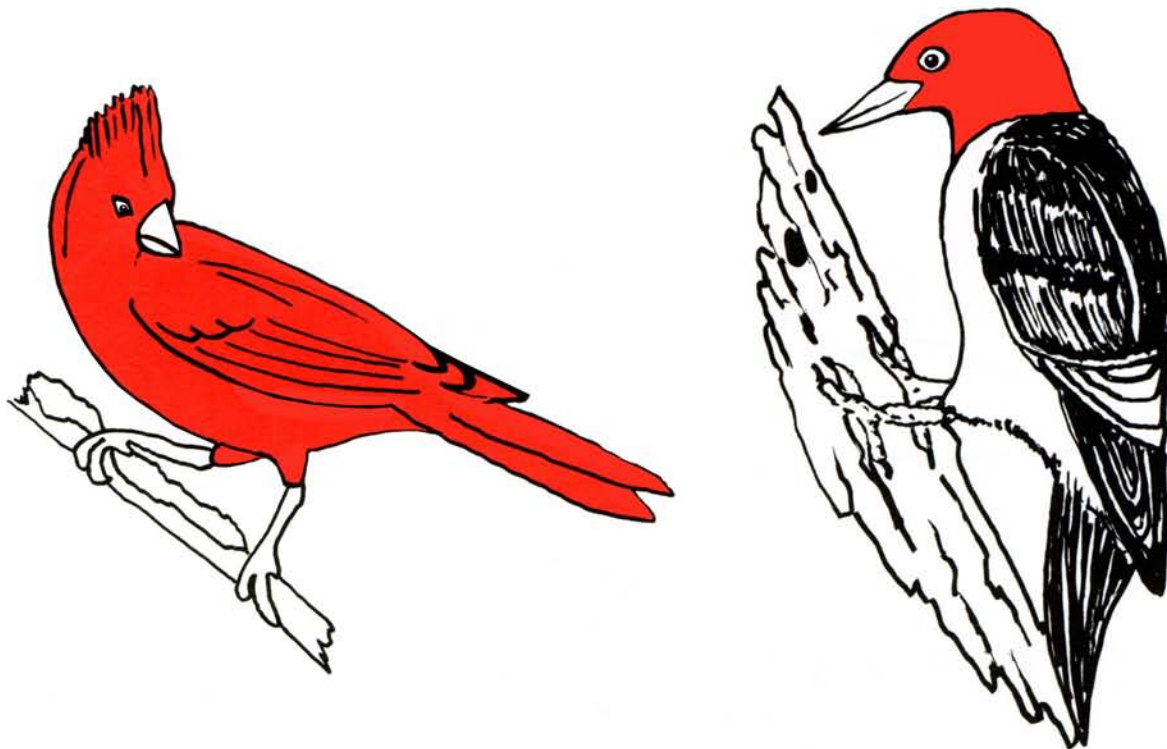

Some animals have red on them. The color may be a warning to other animals to STOP. The black widow spider has a red mark on its black body. It means DON'T TOUCH ME!

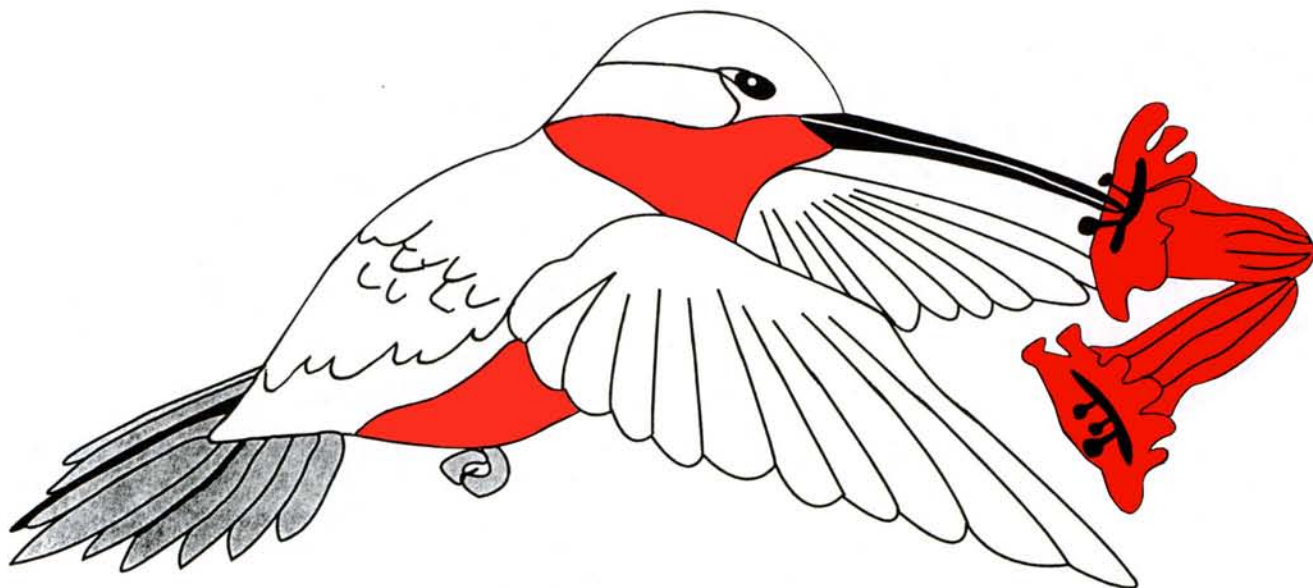

The red ladybug is easy for hungry birds and lizards to see. But they STOP and do not eat the little insect. Ladybugs have a bad taste and smell.

Red is a very pretty color. The redbird, or cardinal, has red feathers. The red-headed woodpecker has red, white and black feathers.

Plants may have red flowers or fruit. The hummingbird loves to drink the juices of red flowers.

Color the red fruit. Can you name each one?
